

CASE STUDY

PALMERSTON STREET HAMILTON

CLASSIC BRICK VENEERS

PROJECT

Modern Living Meets Timeless Style in Central Hamilton, This stunning 2-bedroom townhouse development in the heart of Hamilton – just a short stroll to the CBD's hip cafes, the Waikato Hospital, and the scenic Hamilton Lake.

DESIGN

This past project by Assured Property showcases the elegance of Bowers Brothers Concrete Classic Bricks in “Red” – a rich, volcanic-inspired hue that adds warmth and contrast to contemporary cladding styles. The result? A bold, balanced blend of style and texture that stands out. Loved by architects for their smaller size and diverse colour range, Bowers Classic Bricks are quickly becoming a go-to for fresh, flexible design.

The Bowers Brothers Classic Brick Veneer System provided the following benefits to the project:

- ✓ Convenient to install due to smaller dimensions
- ✓ Smaller proportions for a modern, contemporary look
- ✓ Eight neutral inspired colours available

CLIENT

Assured Property Investments

LOCATION

Palmerston St, Hamilton
